Inset Map
scale 1:25,000

Key

- Site Boundary
- Study Area (5km minimum radius)
- Viewpoint locations

Zone of Theoretical Visibility (ZTV)

- Zone of Theoretical Visibility

Note:

The ZTV illustrates an area of theoretical visibility of the proposed development, calculated to a height of 3m above existing ground level (EGL) and a viewer height of 1.7m above EGL.

The ZTV is based on Natural Resources Wales Digital Surface Model (DSM) data reflected in the extent of predicted visibility.

The ZTV forms an appropriate starting point for undertaking the landscape and visual impact assessment and selection of viewpoints.

The ZTV was calculated using QGIS software and Natural Resources Wales Lidar Composite Dataset DSM 2m data. Where Lidar data is not available OS Terrain50 DTM data is used and presented on Ordnance Survey (OS) raster tiles of 1:50,000 scale
