## Geomorphology Target Notes

Target Note	Ordnance Survey Grid Reference	Description	Photographs
001	254597, 610035	Looking generally west from the proposed site entrance to Peat Hill.	
002	254687, 610210	Looking generally west along the northern slope of Peat Hill. Note the dominance of grasses and grazing pasture.	
003	254789, 609760	Looking generally north along the western slope of Peat Hill across BP-A and towards the proposed route of the access track.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
004	254937, 609759	Looking generally northwest along the northern slope of Peat Hill within BP-A at an exposure of igneous bedrock. Note the mineral grasses and grazing pasture.	
005	255086, 609758	Looking generally northwest to Peat Hill across BP-A and across the proposed access route of the hill.	
006	255239, 609959	Looking generally north from Peat Hill to the B741. Note the mineral grasses indicating the absence of significant depths of peat.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
007	255189, 609708	Looking generally west from adjacent to the access track.	
008	255489, 609660	Looking generally south towards Barbeys Hill and across Blood Moss and the proposed locations of the temporary compound and the substation.	
009	255383, 609426	Looking generally north towards Peat Hill across a flush in the foreground.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
010	255090, 609307	Looking generally north towards the proposed location of T16.	
011	255429, 609224	Looking generally southeast towards Chang Hill and Benty Cowan Hill from the access track. Note the steep valley in the distance.	
012	255434, 609020	Looking generally east towards Rigg Hill from the temporary construction compound.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
013	255467, 609045	Looking north to Peat Hill across Blood Moss showing a potential peat pipe in the foreground, denoted by a line of rushes.	
014	255490, 609011	Looking generally south from the temporary construction compound towards Enoch Hill (right summit), High Chang Hill (left of Enoch Hill) and Barbeys Hill (in foreground).	
015	255419, 608896	Looking generally southeast from the temporary construction compound towards Chang Hill showing the steep sided valleys of Catlock Burn (left) and Littlechange Burn (right).	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
016	255385, 608804	Looking generally northeast over the proposed location of the temporary construction compound and substation towards Peat Hill (left summit).	
017	256096, 608694	Looking southeast from Rigg Hill down in to the steep sided valley of the Crocradie Burn and the confluence with the Catlock Burn (right).	
018	255690, 608502	A peat substrate exposure along near the banks of the Knockburnie Burn. Note the thin organic soils overlying Glacial Till, denoted by the red line.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
019	255450, 608333	Looking north over a flush adjacent to the Knockburnie Burn.	
020	255187, 608205	Looking north across the proposed location of T16 towards Barbeys Hill (foreground) and Enoch Hill in the distance.	
021	256291, 608508	An example of a recent translational failure of the mineral soils along the steep sided valley of the Catlock Burn.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
022	256085, 608436	Looking downslope from the head of a translational failure on the steep north facing slope of Littlechang Hill.	
023	256092, 608405	Looking generally northeast along the steep sided valley of the Crocradie Burn. Note the numerous translational failures along the valley.	
024	255944, 608345	Looking in a downstream direction along the Littlechang Burn. Note the steepness of the streams gradient and further evidence of translational failures.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
025	255991, 608297	Evidence of translational failure along the valley of the Littlechang Burn.	
026	255991, 608302	Bedrock exposures along the steep sided valley of the Littlechang Burn.	
027	255990, 608203	Exposed superficial deposits along the Littlechang Burn. Note the granular nature of the soils which include coarse gravels, cobbles and boulders.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
028	255947, 608161	Looking generally southeast at a potential peat pipe and pipe collapses extending upslope to the northeast of T2.	
029	255910, 608045	Looking generally north-northwest towards Rigg Hill from T2.	
030	255667, 608060	Looking generally west towards Carsphairn Forest and Lethans Hill to the west of the site. In the foreground is an example of one of the many drainage ditches.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
031	255788, 607806	An example of the peat profile taken on the northern slope of Barbeys Hill. Note the low water content and the relatively high fibrosity of the sample and the present of sandy clayey substrate at the base of the sample (right).	
032	255847, 607290	Looking generally northeast across Barbeys Hill and the route of the access track to T17 which avoids the haggings in the distance.	
033	256090, 606698	Looking generally north from Enoch Hill along the western site boundary.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
034	256405, 606162	Potential evidence of tension cracking and slope creep of the peat around the location of T19.	
035	256291, 607210	Looking generally south towards High Chang Hill. Note the exposure in the foreground which indicates granular soils.	
036	256484, 606900	Looking generally southeast across the source of Bitch Burn with evidence of haggling and flushes.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
037	256685, 606866	Looking generally southwest towards an area of haggging (in the distance) to the northeast of T7 which is over the horizon.	
038	256687, 606802	A closer example of the hags shown in target note 037.	
039	256784, 606682	A peat exposure at a hagg to the northeast of T7. Note the granular nature of the peat substrate.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
040	256575, 606536	Looking generally southeast across a flush adjacent to the micro-siting allowance for T17.	
041	256885, 608904	Looking generally north towards Dalleagles from the northern slope of Chang Hill.	
042	256787, 608403	Looking across Chang Hill towards Benty Cowan Hill and the location of T14.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
043	256687, 608003	An example of the shallow soil profile on Chang Hill comprising an organic horizon of <0.5m depth over gleyed sandy clay.	
044	257487, 608606	Looking generally northwest towards High Chang Hill across Trough Burn.	
045	255395, 607909	A potential peat pipe collapse to the south of BP-C.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
046	257661, 607965	A pond formed in shallow peat in the col between Benty Cowan Hill and High Chang Hill located adjacent to the proposed track to T18.	
047	257364, 607808	Looking generally northwest along the route of the tracks to T14 and T18.	
048	257266, 607283	Peat pipe collapses to the north of T10 near the source of the Polga Burn. Collapses are present in front and behind of the person.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
049	257225, 607280	A peat pipe collapse on the Polga Burn. The form of the collapse may indicate that surface water may surcharge into the collapse during heavy rainfall causing scour when flows subside.	
050	257386, 606706	Looking northeast along the Connel Burn from adjacent to T12.	
051	257409, 606692	Evidence of gully formation in the mineral soils to the north of T12.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
052	257849, 607542	Looking across the micro-siting allowance for T15 up towards High Change Hill.	
053	258685, 609008	Looking generally northeast across the source of the Blarene Burn. Note the dominance of mineral soils in this area.	
054	259007, 608401	Looking along the steep sided valley of the Connel Burn.	

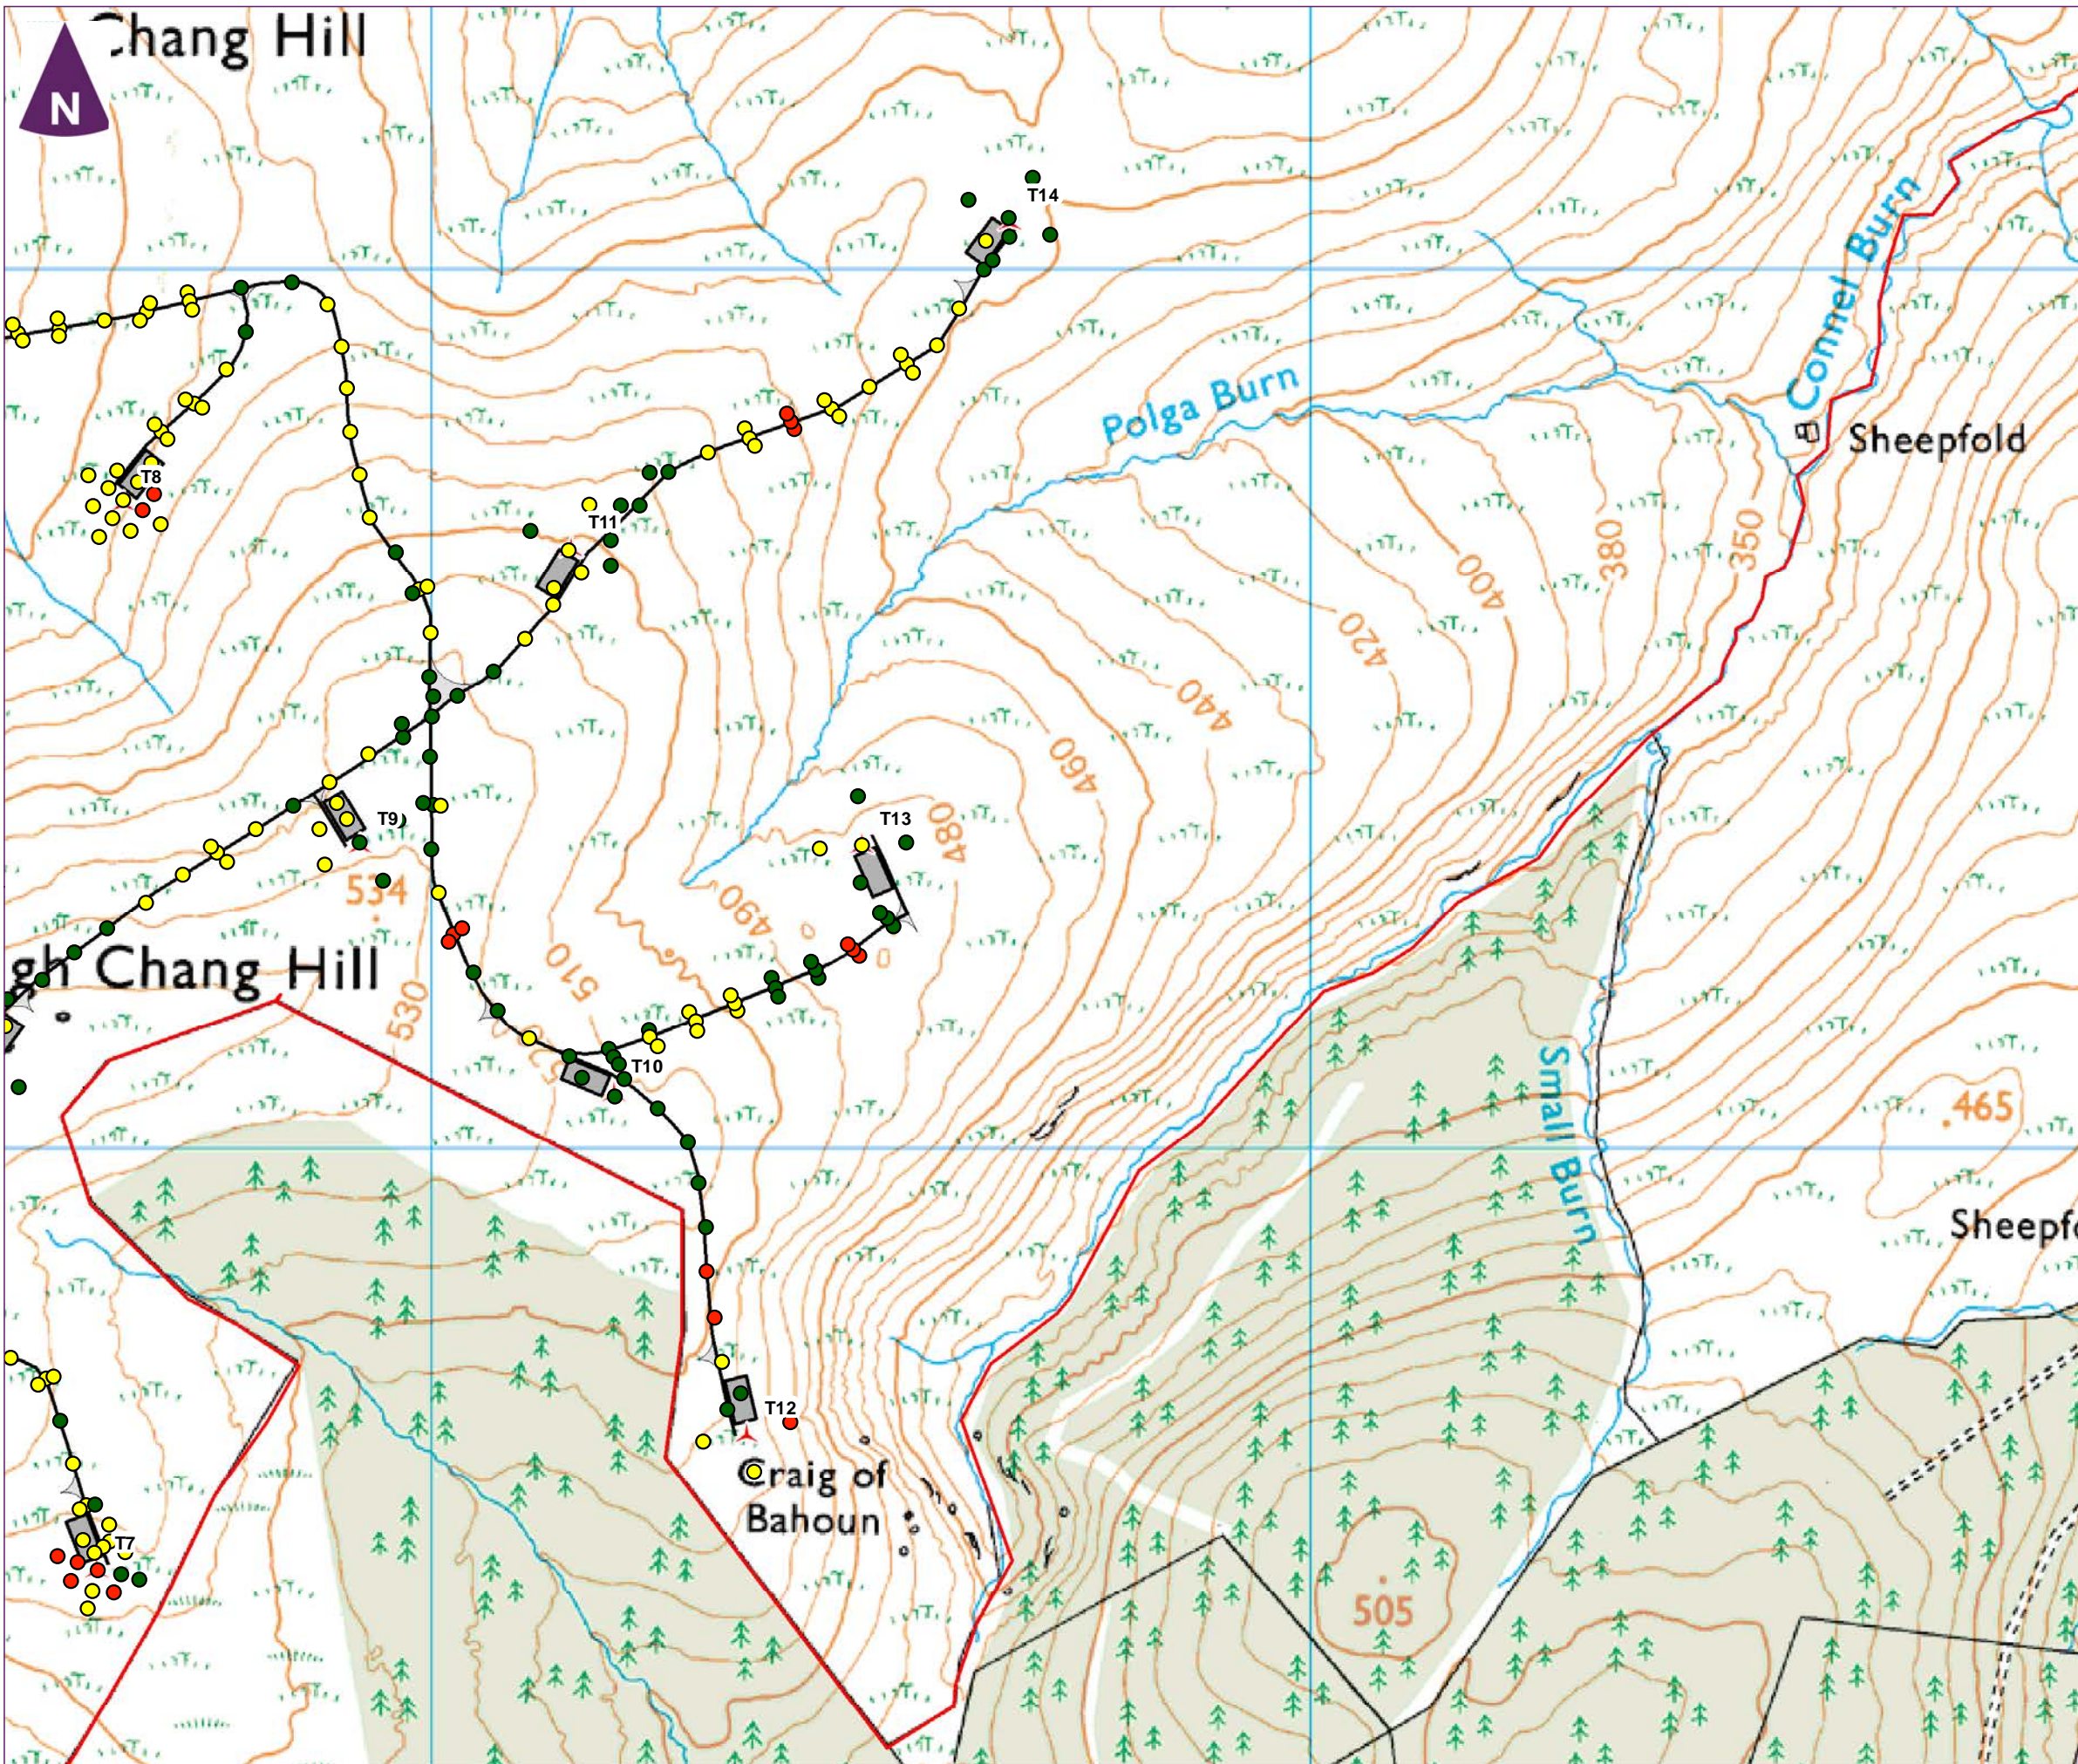

Target Note	Ordnance Survey Grid Reference	Description	Photographs
055	256108, 607908	Looking southwest towards Barbeys Hill over an area of haggging near T17.	
056	255786, 608211	Looking northeast along the valley of the Crocradie Burn with Rigg Hill to the left and Chang Hill on the right.	
057	257512, 608112	An example of a moss filled grip within the micrositing allowance of T14.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
058	256128, 606922	A peat slump on the northern slope of Enoch Hill to the northeast of T4.

## Geomorphology Target Notes

Target Note	Ordnance Survey Grid Reference	Description	Photographs
001	254597, 610035	Looking generally west from the proposed site entrance to Peat Hill.	
002	254687, 610210	Looking generally west along the northern slope of Peat Hill. Note the dominance of grasses and grazing pasture.	
003	254789, 609760	Looking generally north along the western slope of Peat Hill across BP-A and towards the proposed route of the access track.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
004	254937, 609759	Looking generally northwest along the northern slope of Peat Hill within BP-A at an exposure of igneous bedrock. Note the mineral grasses and grazing pasture.	
005	255086, 609758	Looking generally northwest to Peat Hill across BP-A and across the proposed access route of the hill.	
006	255239, 609959	Looking generally north from Peat Hill to the B741. Note the mineral grasses indicating the absence of significant depths of peat.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
007	255189, 609708	Looking generally west from adjacent to the access track.	
008	255489, 609660	Looking generally south towards Barbeys Hill and across Blood Moss and the proposed locations of the temporary compound and the substation.	
009	255383, 609426	Looking generally north towards Peat Hill across a flush in the foreground.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
010	255090, 609307	Looking generally north towards the proposed location of T16.	
011	255429, 609224	Looking generally southeast towards Chang Hill and Benty Cowan Hill from the access track. Note the steep valley in the distance.	
012	255434, 609020	Looking generally east towards Rigg Hill from the temporary construction compound.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
013	255467, 609045	Looking north to Peat Hill across Blood Moss showing a potential peat pipe in the foreground, denoted by a line of rushes.	
014	255490, 609011	Looking generally south from the temporary construction compound towards Enoch Hill (right summit), High Chang Hill (left of Enoch Hill) and Barbeys Hill (in foreground).	
015	255419, 608896	Looking generally southeast from the temporary construction compound towards Chang Hill showing the steep sided valleys of Catlock Burn (left) and Littlechange Burn (right).	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
016	255385, 608804	Looking generally northeast over the proposed location of the temporary construction compound and substation towards Peat Hill (left summit).	
017	256096, 608694	Looking southeast from Rigg Hill down in to the steep sided valley of the Crocradie Burn and the confluence with the Catlock Burn (right).	
018	255690, 608502	A peat substrate exposure along near the banks of the Knockburnie Burn. Note the thin organic soils overlying Glacial Till, denoted by the red line.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
019	255450, 608333	Looking north over a flush adjacent to the Knockburnie Burn.	
020	255187, 608205	Looking north across the proposed location of T16 towards Barbeys Hill (foreground) and Enoch Hill in the distance.	
021	256291, 608508	An example of a recent translational failure of the mineral soils along the steep sided valley of the Catlock Burn.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
022	256085, 608436	Looking downslope from the head of a translational failure on the steep north facing slope of Littlechang Hill.	
023	256092, 608405	Looking generally northeast along the steep sided valley of the Crocradie Burn. Note the numerous translational failures along the valley.	
024	255944, 608345	Looking in a downstream direction along the Littlechang Burn. Note the steepness of the streams gradient and further evidence of translational failures.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
025	255991, 608297	Evidence of translational failure along the valley of the Littlechang Burn.	
026	255991, 608302	Bedrock exposures along the steep sided valley of the Littlechang Burn.	
027	255990, 608203	Exposed superficial deposits along the Littlechang Burn. Note the granular nature of the soils which include coarse gravels, cobbles and boulders.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
028	255947, 608161	Looking generally southeast at a potential peat pipe and pipe collapses extending upslope to the northeast of T2.	
029	255910, 608045	Looking generally north-northwest towards Rigg Hill from T2.	
030	255667, 608060	Looking generally west towards Carsphairn Forest and Lethans Hill to the west of the site. In the foreground is an example of one of the many drainage ditches.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
031	255788, 607806	An example of the peat profile taken on the northern slope of Barbeys Hill. Note the low water content and the relatively high fibrosity of the sample and the present of sandy clayey substrate at the base of the sample (right).	
032	255847, 607290	Looking generally northeast across Barbeys Hill and the route of the access track to T17 which avoids the haggings in the distance.	
033	256090, 606698	Looking generally north from Enoch Hill along the western site boundary.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
034	256405, 606162	Potential evidence of tension cracking and slope creep of the peat around the location of T19.	
035	256291, 607210	Looking generally south towards High Chang Hill. Note the exposure in the foreground which indicates granular soils.	
036	256484, 606900	Looking generally southeast across the source of Bitch Burn with evidence of haggling and flushes.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
037	256685, 606866	Looking generally southwest towards an area of haggging (in the distance) to the northeast of T7 which is over the horizon.	
038	256687, 606802	A closer example of the hags shown in target note 037.	
039	256784, 606682	A peat exposure at a hagg to the northeast of T7. Note the granular nature of the peat substrate.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
040	256575, 606536	Looking generally southeast across a flush adjacent to the micro-siting allowance for T17.	
041	256885, 608904	Looking generally north towards Dalleagles from the northern slope of Chang Hill.	
042	256787, 608403	Looking across Chang Hill towards Benty Cowan Hill and the location of T14.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
043	256687, 608003	An example of the shallow soil profile on Chang Hill comprising an organic horizon of <0.5m depth over gleyed sandy clay.	
044	257487, 608606	Looking generally northwest towards High Chang Hill across Trough Burn.	
045	255395, 607909	A potential peat pipe collapse to the south of BP-C.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
046	257661, 607965	A pond formed in shallow peat in the col between Benty Cowan Hill and High Chang Hill located adjacent to the proposed track to T18.	
047	257364, 607808	Looking generally northwest along the route of the tracks to T14 and T18.	
048	257266, 607283	Peat pipe collapses to the north of T10 near the source of the Polga Burn. Collapses are present in front and behind of the person.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
049	257225, 607280	A peat pipe collapse on the Polga Burn. The form of the collapse may indicate that surface water may surcharge into the collapse during heavy rainfall causing scour when flows subside.	
050	257386, 606706	Looking northeast along the Connel Burn from adjacent to T12.	
051	257409, 606692	Evidence of gully formation in the mineral soils to the north of T12.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
052	257849, 607542	Looking across the micro-siting allowance for T15 up towards High Change Hill.	
053	258685, 609008	Looking generally northeast across the source of the Blarene Burn. Note the dominance of mineral soils in this area.	
054	259007, 608401	Looking along the steep sided valley of the Connel Burn.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
055	256108, 607908	Looking southwest towards Barbeys Hill over an area of haggling near T17.	
056	255786, 608211	Looking northeast along the valley of the Crocradie Burn with Rigg Hill to the left and Chang Hill on the right.	
057	257512, 608112	An example of a moss filled grip within the micrositing allowance of T14.	

Target Note	Ordnance Survey Grid Reference	Description	Photographs
058	256128, 606922	A peat slump on the northern slope of Enoch Hill to the northeast of T4.
