Future Bright Community Funds

Quarterly update: April- June 2026

Investing in local communities has the power to drive meaningful change. At RWE, we are setting the standard by empowering communities across the UK through funding initiatives made possible by our renewable energy projects.

Case Study Musical Keys

“Over recent years, we have received enquiries from young people, parents and carers who find group activities overwhelming, they have been looking for something quieter and calmer, whilst being able to work with others who also have heightened sensory processing needs. The grant has let us pilot our idea to take our work outside, to embrace flora, fauna and human-made environments and to reach new audiences.”

Oliver Payne | Programme Director

Musical Keys is a charity which provides people with opportunities to engage with music and the arts. Making music available to all to improve life experiences and wellbeing.

Working with community musicians, music therapists and tutors, Musical Keys supports people of all ages and abilities who may be facing different challenges, including those receiving end-of-life care, neurodiverse young people, and older people experiencing isolation or dementia.

Musical Keys is an inclusive space where everyone is welcome. Whatever your background or circumstances, you can join a session, connect with others, and be part of a supportive community.

Musical Keys have been actively serving the people of Norfolk for many years and with a £5160 grant from RWE's Norfolk Offshore Wind Farms Community Fund, they have been able to expand and create an inspiring new programme of activities that connect their groups to nature and the environment.

Case Study North Norfolk Community Transport

“RWE’s grant has been transformative for NNCT, supporting the running of our accessible electric car and minibus. It has kept both vehicles safely on the road, reducing our carbon footprint while providing a vital lifeline for people across rural North Norfolk who have few or no other transport options.”

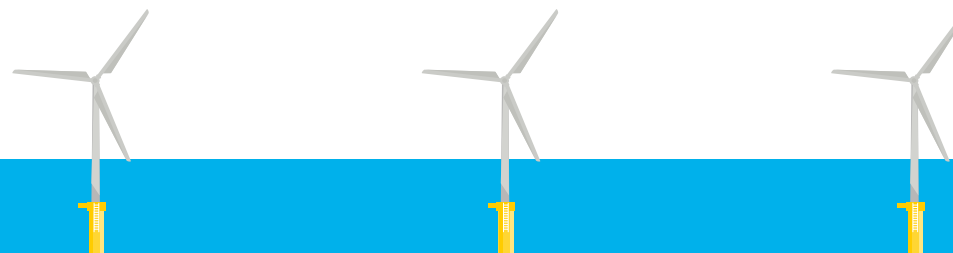

Jane Bishop | CEO

North Norfolk Community Transport (NNCT) is an indispensable community transport organisation working across the county, where in many parts access to public transport can be scarce, unreliable and, in some places it is non-existent.

NNCT’s Dial-a-Ride service is an essential door to door service and often the only means of transport for older people with reduced mobility who need to reach essential services.

With funding from RWE’s Norfolk Offshore Wind Farms Community Fund, NNCT has been able to cover essential maintenance and driver costs for their electric mini-bus and wheel-chair accessible electric car allowing many in this rural part of the world to maintain their independence with sustainable and low-emission transport.

Our Community Funding Snapshot

Up to June 2026

To date (as of the end of June 2026) UK renewable energy projects operated by RWE across the UK have invested more than £52 million in community funds.

£52 million

So far in 2026 renewable energy projects operated by RWE in the UK contributed:

215

Total number of grants

£1.8 million

Contributed to community funds

£300

Smallest grant
