- 1-3 turbines may be theoretically visible
- 4-7 turbines may be theoretically visible
- 8-11 turbines may be theoretically visible
- 12-15 turbines may be theoretically visible
- Wind farm may be theoretically visible
- Wind farm would not be visible (Area is outwith the ZTV)

Notes: This drawing is based on a computer generated Zone of Theoretical Visibility (ZTV). The areas shown indicate the maximum theoretical visibility of the proposed turbines using OS Terrain 50 data only and do not take account of any screening from vegetation or built-form. The ZTV also includes an adjustment that allows for the Curvature and Light Refraction of the Earth.
