

Decommissioning & Repowering*

***Decommissioning and repowering activities at RWE Renewables are currently at an early stage of development.**

We are therefore seeking dialogue with suppliers across all relevant categories. In parallel, our procurement strategies for these areas are also being developed.

Deconstruction

Cable removal

Dredging services

Foundation removal

Offshore substation removal

Onshore works demolition

Scour protection removal

Turbine/tower removal

Vessels

Material Pathways

Cables

Circularity/reuse

Critical materials

Decommissioning ports

Electrical equipment

LCA assessment

Steel/metal recycling

Wind turbine generator blades

Planning

ERPD contract
