

## Press release

# Great Britain's T-4 capacity auction for delivery in 2029/30 has concluded: RWE secured 6,373 MW of capacity agreements

- **The auction cleared at £27.10/kW/year**
- **34 RWE assets successfully secured 1-Year Agreements**
- **4 RWE assets successfully secured 3-Year Refurbishment Agreements**
- **1 RWE asset successfully secured a 15-Year Agreement**

Swindon, 10 March 2026

The T-4 Capacity Market auction has concluded, for delivery in 2029/30. The EMR Delivery Body (NESO) has announced that the capacity auction has cleared at £27.10/kW/year, and 40,108.608 MW of capacity has been secured for Great Britain.

A provisional list of the GB assets that have successfully secured an Agreement can be viewed [here](#). This information is still subject to Secretary of State approval.

RWE has secured agreements for all of the Capacity Market Units (CMUs) that were entered into the auction. This means RWE has 6,373 MW (derated) of capacity agreements beginning in the 2029/30 delivery year.

RWE has been successful in securing T-4 agreements for a range of technologies including: 17 1-year agreements and four 3-year refurbishing agreements for the gas fleet and another 16 1-year agreements for the hydro, wind and battery storage CMUs which were entered. Additionally, one 15-year agreement was secured for a battery storage project. Both battery storage CMUs will be co-located with solar.

The GB Capacity Market remains a cornerstone of the country's energy market design and has provided stability for power generation companies over the past decade. As older renewable sites become eligible to enter the Capacity Market auctions, this will offer an important additional revenue stream—supporting long-term viability.

RWE is the UK's largest operator of Combined Cycle Gas Turbine (CCGT) power plants, with a modern and efficient fleet of around 7GW installed capacity, ensuring security for the country's energy supply. The company is developing carbon capture and storage options at four sites, reinforcing its commitment to decarbonisation.

**RWE**

*RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.*
