

Press release

Wind power from RWE accelerates Breedon's journey towards net zero

- **RWE signs long-term Power Purchase Agreement with Breedon until 2041**
- **Two RWE wind farms will deliver green electricity – first, Gwynt y Môr Offshore Wind farm and later Brechfa Forest West Onshore Wind farm**
- **Breedon will use the renewable power across its GB operations to support the decarbonisation of energy intensive construction materials production**

Essen, Breedon on the Hill, 29 April 2026

RWE, the UK's largest power generator and a leading renewable energy company, has signed a long-term Power Purchase Agreement (PPA) with Breedon Group plc, a leading essential construction materials provider. Under the 15-year agreement, RWE will supply around 70 gigawatt hours of renewable electricity per year from its wind portfolio to Breedon's sites across Great Britain, supporting the company's transition to lower carbon operations. Power will initially be supplied from RWE's Gwynt y Môr Offshore Wind farm, located approximately 15 miles off the coast of North Wales in the Irish Sea. From 2033, the Brechfa Forest West Onshore Wind farm in Wales will provide the renewable power. The renewable power will be used to support the production of aggregates, asphalt, ready-mixed concrete, cement production, and other essential building products. It will help to reduce Scope 2 emissions from electricity consumption in an industry where decarbonisation is both critical and complex.

Olaf Lubenow, Head of Commodity Solutions UK, North & South Europe at RWE, said:

"We are delighted to have concluded this long-term-PPA with Breedon. The agreement underlines our commitment to supporting the construction materials sector on its journey towards a more sustainable future. By supplying reliable renewable electricity from our wind portfolio, we are helping to reduce the carbon footprint of Breedon's operations while supporting their ambition to build a more sustainable construction materials business."

Donna Hunt, Group Sustainability Director at Breedon, commented: "Entering this Power Purchase Agreement with RWE is a meaningful step forward in our sustainability journey. It not only secures long-term energy stability for Breedon but also accelerates the decarbonisation of our operations and supports our continued investment in innovative, lower carbon products and solutions for the built environment. More broadly, it reflects our commitment to responsible, long-term growth, transparent ESG performance, and delivering lasting value for our stakeholders as we help shape a more sustainable construction sector."

Supporting Breedon's net-zero ambitions

Breedon has set Science Based Targets initiative (SBTi)-approved near-term and net-zero targets, committing to reduce absolute Scope 1 and Scope 2 emissions, as well as Scope 3 emissions from purchased clinker and cement, by 23.3% by 2030, from a 2022 baseline, and to achieve net-zero greenhouse gas emissions across its value chain by 2050. The increased use of renewable electricity, alongside fuel switching, energy efficiency measures and participation in innovative decarbonisation projects such as carbon capture, underlines Breedon's commitment to supporting a more sustainable built environment and accelerating the transition to a low-carbon construction sector.

RWE Supply & Trading GmbH

RWE Supply & Trading is the interface between RWE and the energy markets around the world. Over 2,000 employees from around 90 different countries trade electricity, gas, commodities, and CO2 emission allowances. Accurate market analyses and a high degree of customer centricity enable them to create innovative energy supply solutions as well as risk management concepts for industrial operations. The trading entity also ensures the commercial optimisation of RWE's power plant dispatch and markets electricity from RWE. In addition, there are legally independent RWE gas storage companies in Germany under the umbrella of RWE Supply & Trading.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations, and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
