

RWE in Scotland

A committed partner for Scotland: delivering clean energy projects

Involvement in over

585 MW¹

of renewable electricity projects in construction and generation, including Scotland's first commercial-scale offshore wind farm Robin Rigg

Ambitions to develop

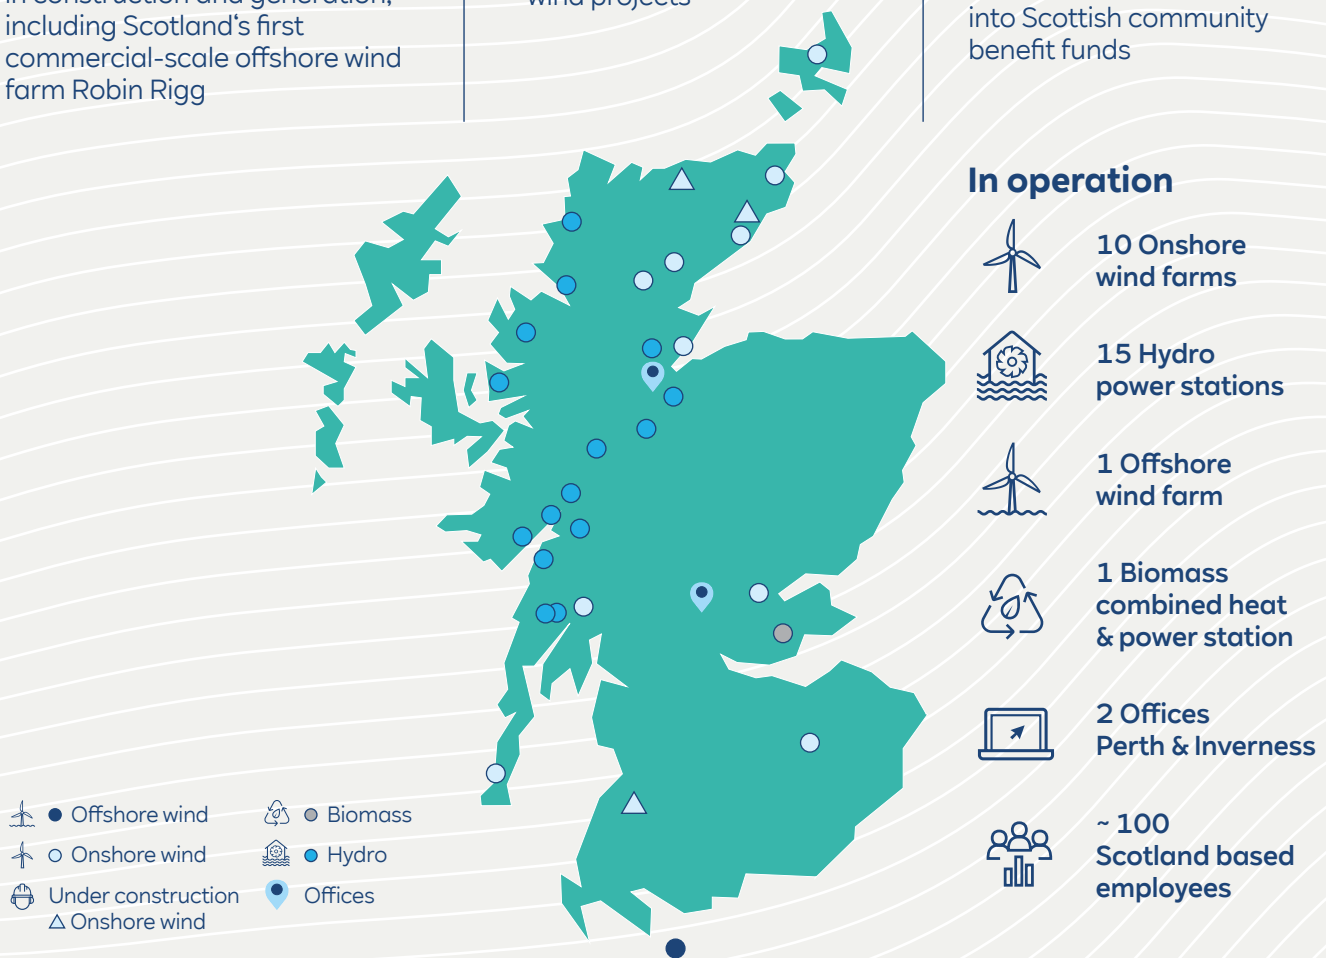

1,200 MW

pipeline of 16 onshore wind projects

Over their lifetime, the renewables projects that we currently operate will contribute more than

£17 million

into Scottish community benefit funds

¹ Including An Suidhe (19.3 MW), 51% owned by RWE

RWE's clean and green growth in Scotland

Scotland is a key market for RWE. With our strong pipeline of development projects, we are fully committed to helping Scotland achieve its ambitious climate change targets, alongside our own net zero targets.

We have recently started construction of two new Scottish onshore wind projects, Camster II and Enoch Hill, and expect to begin a third in 2024.

Alongside our onshore wind projects, we are exploring several electrolytic green hydrogen projects to provide hydrogen for use in heavy industries, homes and businesses across Scotland.
